

RHODE ISLAND COUNTRY CLUB
BARRINGTON, RHODE ISLAND 02806

December 2016

To whom it may concern,

Catanzaro & Sons was contracted in the Spring of 2016 to repaint the exterior of the Clubhouse facility at Rhode Island Country Club. The work was to include painting of the exterior siding, window trim, shutters, dormers and chimneys. All areas were sanded and scraped, washed, caulked, primed and finish coated. All windows were re-glazed.

A large crew was dispatched to get the work done as quickly as possible and acted in a professional manner at all times. Management of the process was excellent and there was constant communication with RICC regarding progress and any deficiencies.

Another part of the work included carpentry of water damaged areas found near the Pro Shop. The siding had to be replaced and the framing behind it rebuilt. This was handled easily and the finished product is a perfect match.

This was a good deal of work that was finished in a short period of time with minimal disruptions to business as the Club was preparing for a busy Spring season.

Also, in May of 2015 Catanzaro & Sons was hired to apply two coats of stain to our newly constructed fence around the Pool facility. There was a very tight deadline for this since opening day was approaching and Mike was able to complete about 480 linear feet of 6 foot high fence in less than a week.

Without a doubt Catanzaro & Sons provide a professional service of the highest quality and work as a great team.

Sincerely,

A handwritten signature in cursive script that reads "Kevin M. Callahan".

Kevin M. Callahan
